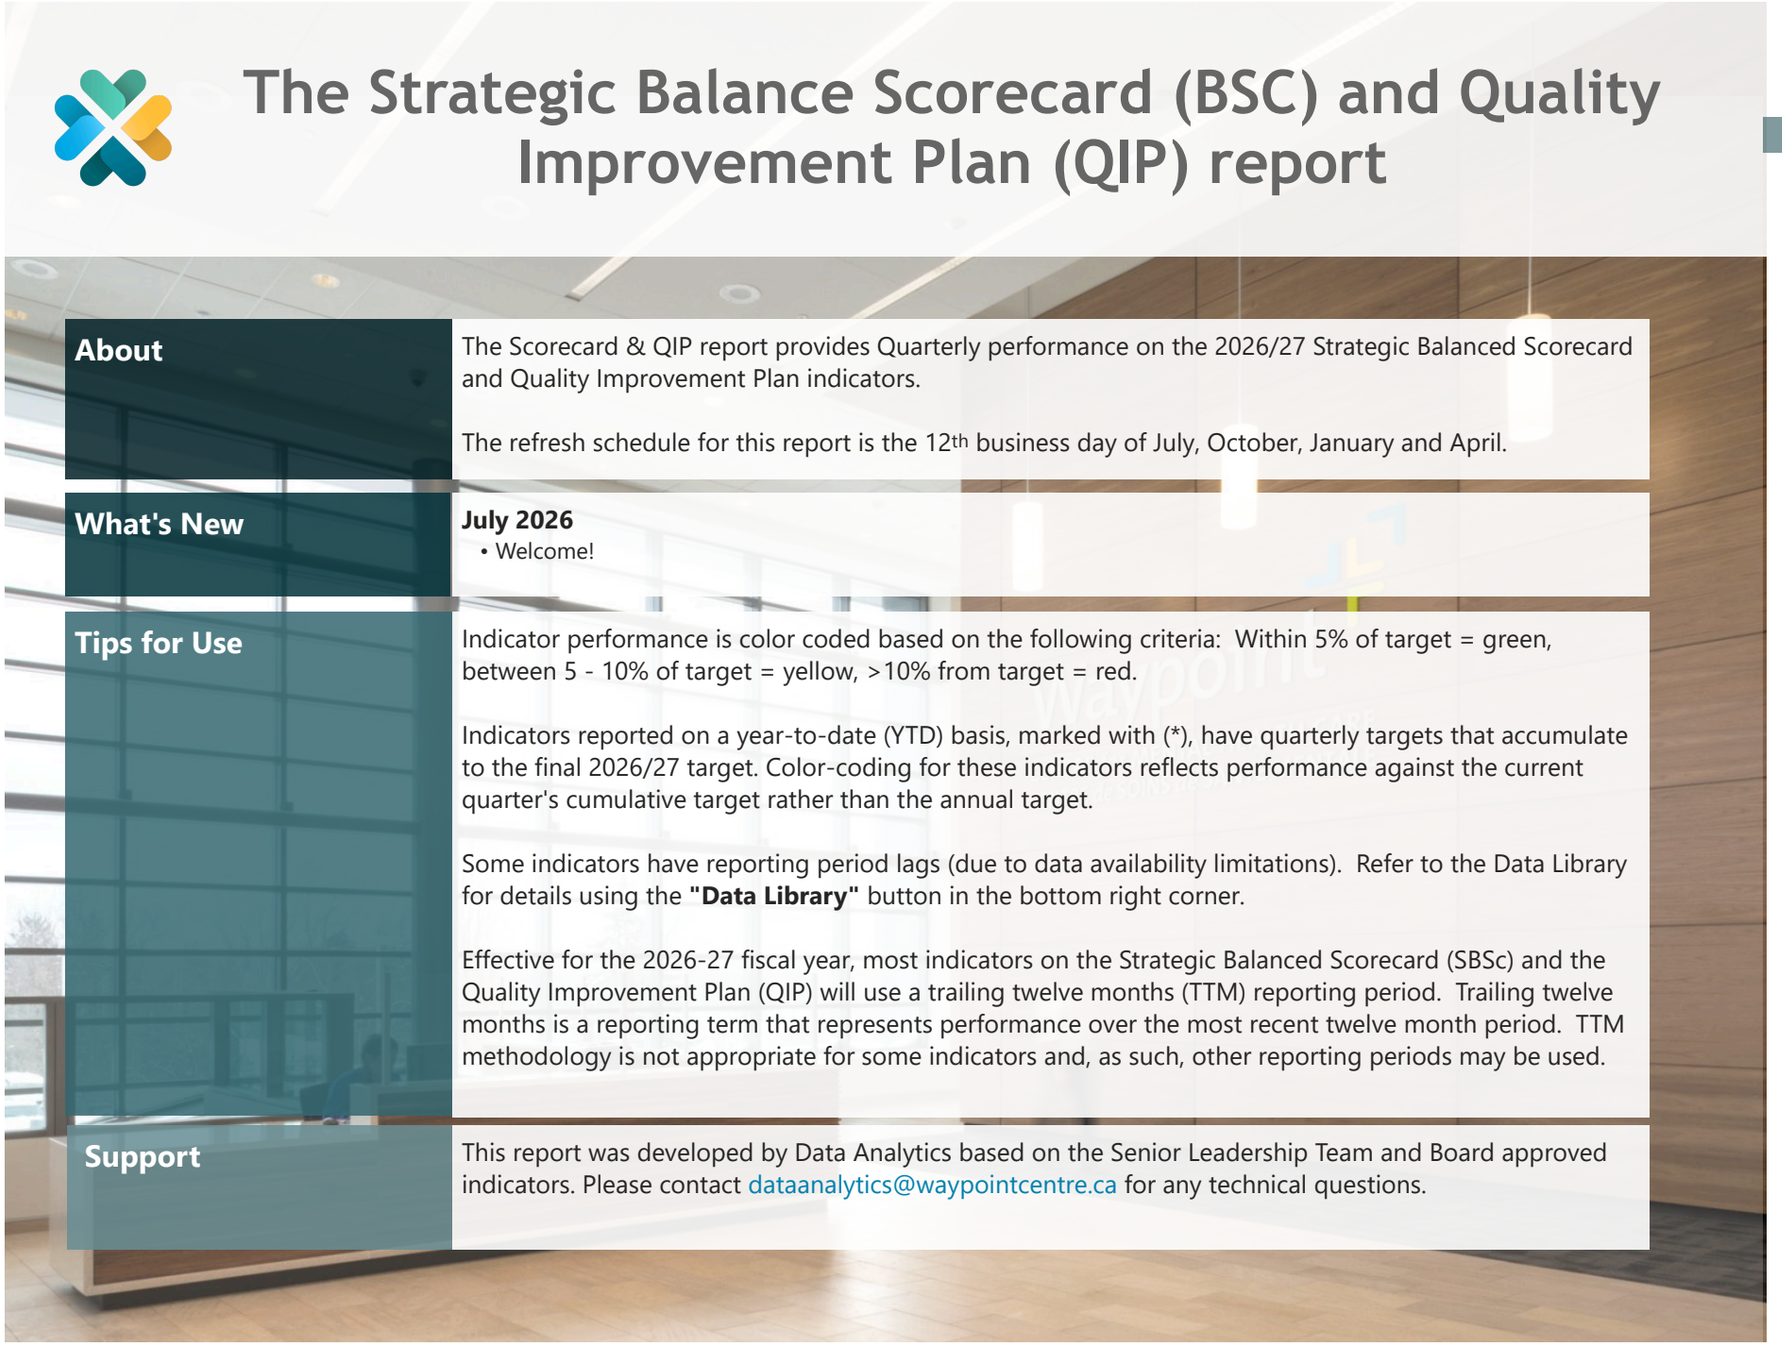
The Strategic Balance Scorecard (BSC) and Quality Improvement Plan (QIP) report



About

The Scorecard & QIP report provides Quarterly performance on the 2026/27 Strategic Balanced Scorecard and Quality Improvement Plan indicators.

The refresh schedule for this report is the 12th business day of July, October, January and April.

What's New

July 2026

- Welcome!

Tips for Use

Indicator performance is color coded based on the following criteria: Within 5% of target = green, between 5 - 10% of target = yellow, >10% from target = red.

Indicators reported on a year-to-date (YTD) basis, marked with (*), have quarterly targets that accumulate to the final 2026/27 target. Color-coding for these indicators reflects performance against the current quarter's cumulative target rather than the annual target.

Some indicators have reporting period lags (due to data availability limitations). Refer to the Data Library for details using the **"Data Library"** button in the bottom right corner.

Effective for the 2026-27 fiscal year, most indicators on the Strategic Balanced Scorecard (SBSc) and the Quality Improvement Plan (QIP) will use a trailing twelve months (TTM) reporting period. Trailing twelve months is a reporting term that represents performance over the most recent twelve month period. TTM methodology is not appropriate for some indicators and, as such, other reporting periods may be used.
